VISION

Is to become the leading engineering consulting company in the global market.

MISSION

To provide consulting services to increase productivity of our clients and to equip management and employees with the needed skills to increase output and expand growth. With VAK, we ensure comprehensive added value for a success story

CORE VALUES

A commitment to being trustworthy and to act in an environmentally friendly way with

Innovation and excellence

Commitment to teamwork

***Your Partner
in Growth***

CONSULTING

VAK Consult is an expert in consulting and solving complex problems, devise invaluable strategies and improve the financial and operational health of our clients organizations. We help our clients solve specific problems and develop long-term strategies for improving chronic complaints and permanent problems. Most companies hire management consultants for their industry insight, problem-solving abilities, and logical objectivity.

PROJECT DEVELOPMENT

Our services facilitate Project Development and aim at turning promising innovative ideas into feasible project concept whilst adding creativity and providing direction in all development stages. We support and co-develop your idea into a valuable process, product or service.

SCRUM VALUES

All tasks performed in scrum needs to get set of values as the foundation for the team's processes and interactions. The scrum values include: Focus, Courage, Openness, Commitment and Respect. Every scrum team needs to adapt these five values to deliver;

COURAGE

FOCUS

COMMITMENT

RESPECT.

COACHING

Our main aim is to unlock our clients' potential to maximize their own performance and focus on the 'here and now rather than on the distant past or future. While there are many different models of coaching, here, we are not considering the coach as expert' but, instead, the coach as a facilitator of learning.

OBJECTIVES OF IMPLEMENTING OPERATIONAL EFFICIENCY STRATEGY

Our objective is to minimize unnecessary expenses and deliver quality products at a better price range, to maximize our profits, to secure competitive advantage, to strengthen our brand value, and to deliver greater customer service.

OPERATIONAL EFFICIENCY

Operational efficiency is a business entity's ability to produce, process, and deliver goods and services to its customers cost-effectively, without waste and at the highest quality. It is also described as the ratio of output gained to the input to run the operations. This is achieved by minimizing waste and unemployment while utilizing technology, workforce, resources, systems, and business processes. The reduced cost enables higher profit margins and more success in competitive markets.

PROJECT EXPERIENCES

VAK Consult Limited is an engineering consulting company and works with strategic projects partners to leverage each other's strengths, expertise and experience and business networks together provide Turn-Key projects and solutions to our clients. Within this business arrangement, we together with our partners all benefits from expertise in Projects Development Feasibility Study and Business Plans, supervising construction Works, constructing High rise structures, post-construction facility management and projects consulting services
